Thank you for visiting our website and considering ABSC for your collection needs.

ABSC is an exclusive commercial account recovery firm with 99% of our income coming from contingency fee based commercial collections nationwide. Under these circumstances we must be successful in collecting for our clients in order to survive and to maintain the tremendous success we've experienced.

We are not interested in waiting a year or more before we begin to see the debt paid.

Contrary to the mindset of law firms whose main income source is billable hours through a combination of bankruptcy, corporate and tax law and that of general agencies engaging in consumer-retail litigation/recovery, etc., we utilize our presence as an exclusive commercial agency and recover swiftly whenever possible without having to litigate.

Like most others we give humanity the benefit of the doubt, but we also bear in mind that history tends to repeat itself. Our duty is to uncover and discover the historical truth about companies and the people who run them in order to decrease our client's financial exposure.

Please feel free to contact one of our representatives to discuss your needs. We look forward to talking with you concerning our solutions.

Very Truly Yours,

*Joseph Bryant*
